

Open a world of sound for your clients

Introducing a complete family of hearing aids that brings the open sound experience to more of your clients.

Help your clients enjoy all the sounds of life

Oticon Jet PX™ with its embedded Deep Neural Network introduces the open sound experience to our basic category for the first time.* Unlike traditional hearing aids which rely on directionality, Oticon Jet PX with BrainHearing™ technology provides access to the full sound scene with clear contrast and balance. This way, we support the brain's natural way of making sense of sound.

What does Oticon Jet PX offer?

- **The open sound experience**
OpenSound Navigator™ provides your clients with 360° access to speech and clear sound, even in the presence of noise.*
- **A built-in Deep Neural Network**
The Deep Neural Network, a built-in artificial intelligence trained with 12 million real-life sound scenes, provides a more comfortable, natural listening experience.*
- **Support for your client's brain**
Oticon Jet PX embodies our BrainHearing philosophy, supporting the brain's natural way of making sense of sound by giving access to the full sound scene.*
- **The power of Polaris™**
Great sound comes from great sound technology. The Polaris platform fuels fast, reliable sound processing and enables the open sound experience.

* OpenSound Navigator and Deep Neural Network only available in Jet PX 1.

A comprehensive range of styles

Oticon Jet PX is available in nine styles, ranging from discreet IIC and CIC custom solutions to devices with Bluetooth connectivity. Both the miniRITE and miniBTE are available with rechargeable and disposable batteries, and there are two charging options to choose from. There are also two performance levels available, and a variety of different colours to suit your clients' needs.

Oticon SmartCharger

Oticon Desk charger

Help your clients stay connected
